BLISS CASE TO BE CALLED TO-DAY

In Which R. J. Brent Asks that a Restraining Order Be Issued.

The injunction proceedings, instituted against Chas. H. Bliss by Robert J. Brent, will be heard today before Court Commissioner Chas. M. Coston, and it is expected that a decision will be rendered within a short time thereafter.

Mr. Brent has asked for a restraining order to prevent Mr. Bliss from constructing a fence, which closes a street or pathway on Bayou Chico, and which causes the workmen of the Brent mill to travel some distance to reach the plant.

The proceedings were commenced Saturday, and were to have been heard yesterday morning, but the case was continued until this morning.

Mr. Bliss alleges that he has only done what others have, and that he is owner of the property which has been fenced. The question has been thrashed over by different boards of the city and also the City Council, but the matter was dropped some months since.

They Appeal to Our Sympathies.

The bilious and dyspeptic are constant sufferers and appeal to our sympathies. There is not one of them, however, who may not be brought back to health and happiness by the use of Chamberlain's Stomach and Liver Tablets. These tablets invigorate the stomach and liver and strengthen the digestion. They also regulate the bowels. For sale by all druggists.

FIRST PRESIDENT OF BOWLING CONGRESS DEAD.

By Associated Press.
New York, Aug. 21.—Thomas Curtis, first president of the American Bowling Congress, and known throughout the country as the "father of bowling in America," died yesterday from typhoid fever, at his home in Brooklyn. He was 79 years old. Until he fell ill, he had bowled every day for more than twenty years.

In 1888 Curtis organized the first ten-pin bowling tournament in the United States. Within the next few years he assisted in organizing many clubs and became the author of the rules now regulating ten-pin bowling throughout the country.

By Associated Press.
New York, Aug. 21.—Foreign cables at the opening were not especially strong but closed at an advance of 10 points which assisted the professional element and pool operations to hold our market steady with an upward tendency.

The weather shows higher temperatures in Texas. The public interest in the market at present is small and while there seems to be a strong professional element operating for an advance, there is on the other hand an element trying to sell on all rallies. This places the market in rather "dubious" state.

We do not anticipate any unusually active market, but the unprecedented demand for cotton goods should be reflected in the market and we can expect nothing but higher prices, eventually.

ENSIGN WADE OF BENNINGTON AT FAULT

Will Be Courtmartialed for Neglect of Duties, in Connection With Recent Explosion.

By Associated Press.
Washington, Aug. 21.—The findings and opinion of the court of inquiry, which investigated the fatal explosion on the gunboat Bennington, was made public to-day by Secretary Bonaparte, at the navy department.

The court expressed the opinion that the explosion was caused by excessive steam pressure in boiler B, resulting from the closing of a steam valve in connection with the gauge. The court says D. N. Holland, a fireman on duty, closed the valve.

The court finds Ensign Charles D. Wade, of the engineer department of the ship, at fault in failing to see that the steam and safety valves were overhauled at the proper time. Having accepted the verbal statement of a subordinate that this had been done in March, it was clear he was negligent in the performance of duty and should be brought before a court-martial.

The navy department has not yet acted on the proceedings and findings.

MINNESOTA PHYSICIAN TO PROVE EFFICACY OF ARSENIC PREPARATION AS YELLOW FEVER PREVENTATIVE.

The New Orleans correspondent of the New York World writes to that paper as follows:
Dr. Reginald B. Leach of St. Paul, Minn., who has come here at the invitation of local physicians to prove the efficiency of arsenization as a preventive of yellow fever, will allow himself to be bitten by infected mosquitoes of the stegomyia type. He has made arrangements with the Marine Hospital Service to enter the emergency hospital, where there are mosquitoes inoculated with the blood of persons affected with genuine fever. He will come in contact with several stegomyias to make sure that his system is inoculated; then he will return to the St. Charles Hotel, where he will remain under observation. Dr. Leach claims the mosquito poison will not have any effect on a person properly treated with arsenic according to the accepted arsenization theory.

The experiment which Dr. Leach will conduct will be watched by the government surgeons closely. The French government has instructed the local French Consul, Maurice Dantons, to make a special report on the case, which, if successful, will prove that yellow fever cannot be transmitted to persons protected with the arsenic preparation.

OILS FROM FISH.
Valuable Themselves, as Are Also Their Byproducts.

The preparation of oil from aquatic animals for both medicinal and technical purposes is of great importance. The principal oil producers are the whales, porpoises, blackfish, seals, walrus, menhaden, herring, cod, haddock, pollock, hake, cusk, ling, shark, dogfish, alligator and turtle.

Various subsidiary products are obtained from these aquatic oils and form a source of considerable profit to the refiner. Among the more important of these products may be noted the following:

At a low temperature there may be separated from all varieties of aquatic oils a solid fat or grease known as "roofs" or "stearin" which is somewhat similar to the tallow obtained from sheep and oxen. It is used as a substitute for tallow from sheep and oxen in making candles, soap, etc. By bleaching the oils a semisolid fat known as "sperm soap," "whale soap," "menhaden soap," etc., is produced. This material is used in smearing sheep, washing fruit trees, sperm oil spermaceti is obtained, and this is used principally in candle making, as an ointment for medicinal purposes, for producing a polish on linen in laundering and for self lubricating cartridges.

After the oil is extracted the resulting scrap or refuse is dried and sold as fertilizer.

Nothing Left For Amusement
Two young Texas men were talking over the many strange things they had seen and heard in New England.

"That man I was talking with yesterday," said one of them, "he told me that when two fellows in a section have a dispute about land or anything they just go to law and sue each other for damages or get an affidavit or something of the kind."

"That's all well enough for the one that wins," said the other man, "but how about the fellow that loses? Does he go out and buy a gun and get even or what?"

"As near as I can make out," said his friend, "by the time it's settled the man that loses hasn't any money to go buying guns or even birdie tom, and if he owns one it's more likely to be in pawn."—Youth's Companion.

KENTUCKY FEUD BREAKS OUT IN HOWELL CO.

One Man Killed and Several Others
Seriously Injured in a
Pitched Battle.

By Associated Press.
Clay City, Ky., Aug. 21.—In a desperate feud fight on Black Creek, in Howell county, Campbell Anderson was killed and Tom and Caleb Morton, brothers, were seriously wounded, while Will Peasley and Troy Plunkett were seriously hurt. The men were in a blind fight operated by Plunkett when the trouble started between Anderson and Tom Morton, and before the men could be separated Morton was slashed several times with a knife in the hands of Anderson. When it was seen Morton was dead the fight became general between the friends of Anderson on one side and those of Morton on the other. All of the men are among the most prominent of the county and have been known as members of fighting families of early feud days. Further trouble is expected.

MAN'S HEART ON THE RIGHT SIDE

By Associated Press.
Los Angeles, Aug. 21.—When Malcolm Rose, a landscape gardener, was placed on the operating table at the county hospital here to-day to undergo an operation for the removal of a growth from his neck, it was discovered by the surgeons that the patient's heart, instead of being in normal position on the left side of the body, was located on the right side nearly six inches from its proper place. The organ in every way, however, appeared normal. It evidently had been in that position from birth.

Will Take Vacation.
Mayor Pro Tem Oscar Maura will leave to-day on a vacation of about two weeks duration. He goes from here to French Lick, Ind., where he will remain for about ten days, after which he will proceed to Chicago, and remain there for a short while.

FERTILIZER FREE.
Anyone wishing good stable manure gratis, will apply to J. L. Pierce, at The Lewis Bear Company's warehouse.

THIEF GOT AWAY WITH \$3,220

By Associated Press.
Chicago, Aug. 21.—Checks, which
disappeared with Gus Bobbs the miss-
ing employee of Chas. A. Stevens and
Brothers, who vanished last Thursday
while on his way to the Corn Ex-
change National Bank to make a de-
posit for the house, were discovered
wrapped in a newspaper in a down-
town drug store yesterday. The
checks were left at the drug store by
a man last Thursday. There was a
bank deposit slip in the bundle and
this indicated that there was \$3,220
in cash in the possession of Bobbs
when he left the store of Stevens and
brothers. Not a dollar of currency was
in the parcel.

SCHOONER RAN ASHORE DURING THICK WEATHER.

By Associated Press.
Chatham, Mass., Aug. 21.—The coal
laden schooner McKaskell, bound from
New York for Rockland, Maine, ran
on Harkerchief shoal during the
thick weather last night. Mate Nel-
son Taunton, of Rockland, was drown-
ed. Captain Winfield and the other
members of the crew reached shore in
their own boats to-day. The vessel
struck on the shoal at low tide and
when the tide turned she rolled over
and sunk.

THE AGRA DIAMOND.

Odd Manner In Which It Was Smug-
gled Out of India.

Like many other diamonds, the Agra
diamond has had adventures. It gets
its name from the fact that it was taken
at the battle of Agra in 1526 by the
Emperor Baber, who was the founder
of the Mogul empire in India. The
Marquis of Donegal was in Agra in
1857, when the diamond was taken
from the king of Delhi. Donegal was
at the time engaged as secretary and
belonged to the same regiment as the
young officer who obtained possession
of the diamond. It was resolved
among them to smuggle it home to
England rather than give it up and to
share in the loot money. The question
arose how were they to get it home.

No one seemed able to hit upon a
method that would be likely to meet
with success until the last evening pre-
vious to the departure of the regiment.
During the course of dinner the young-
est subaltern suddenly jumped up and
said: "I have it. We will conceal the
diamond in a horse tail and make the
horse swallow it." This met with gen-
eral approbation, a ball was secured,
the inside scooped out, the diamond in-
serted, the end stopped up and the
horse made to swallow it.

When the regiment reached the port
of embarkation the horse was taken
off and had to be shot. The diamond
was taken from his stomach and
brought over to England. It was sub-
sequently sold to the Duke of Brun-
swick, and since then it has been recut
from a forty-six carat stone to thirty-
one and a half carats in order to get
rid of the black spots in it, and it is
the most perfect and brilliant diamond
of a rose pink color.
